Subject Index

Adsorption

- Study of supported iridium catalysts by hydrogen-oxygen titrations. Influence of the support 175

Adsorption

- Studies of molybdena-alumina catalysts. XVII sulfided catalysts exposed to air 199

Ageing

- Hydrogenation of ethyne over an ion-exchanged copper on silica catalyst 209

Ageing

- Coking, ageing and regeneration of zeolites. XI. Coke formation and deactivation of Pt-ultrastable zeolite HY and PtH-mordenite catalysts during hydrogenation of benzene 189

Ageing

- Lithium chemistry of lithium doped magnesium oxide catalysts used in the oxidative coupling of methane 131

Ageing

- Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. II. Catalytic hydrogenation of benzene to cyclohexene and cyclohexane 291

Ageing

- Methanol synthesis catalysts derived from ternary rare earth, copper, zirconium and rare earth, copper, titanium intermetallic alloys 69

Ageing

- Kinetic study of hydrogen transfer of olefins under catalytic cracking conditions 35

Ageing

- Activity and thermoresistance of fused iron catalysts for ammonia synthesis 29

Ageing

- Coking and regeneration of zeolite catalysts in fixed beds during cumene cracking 53

Air

- Studies of molybdena-alumina catalysts. XVII sulfided catalysts exposed to air 199

Alkaline earth oxide

- Role of carbon tetrachloride in the conversion of methane on silica-supported alkali metal added alkaline earth oxide catalysts 83

Alumina

- Study of supported iridium catalysts by hydrogen-oxygen titrations. Influence of the support 175

Ammonia preadsorption

- Influence of the support towards platinum catalysed 1,3-butadiene hydrogenation 241

Ammonia synthesis

- Activity and thermoresistance of fused iron catalysts for ammonia synthesis 29

Barium

- Oxypropylolysis of natural gas 269

Barium/silica

- Role of carbon tetrachloride in the conversion of methane on silica-supported alkali metal added alkaline earth oxide catalysts 83

Benzene

- Coking and regeneration of zeolite catalysts in fixed beds during cumene cracking 53

Benzene hydrogenation

- Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. I. Adsorption of the reduction modifiers, water and ϵ -caprolactam on ruthenium 281

Benzene hydrogenation

- Coking, ageing and regeneration of zeolites. XI. Coke formation and deactivation of Pt-ultrastable zeolite HY and PtH-mordenite catalysts during hydrogenation of benzene 189

Benzene hydrogenation

- Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. II. Catalytic hydrogenation of benzene to cyclohexene and cyclohexane 291

Butadiene hydrogenation

- Influence of the support towards platinum catalysed 1,3-butadiene hydrogenation 241

Caprolactam

- Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. I. Adsorption of the reduction modifiers, water and ϵ -caprolactam on ruthenium 281

Carbon monoxide hydrogenation

Relationship between the catalytic properties and surface composition of a polycrystalline Fe-Ni ribbon 219

Carbon oxides conversion

Isotopic exchange measurements of the rate of interconversion of carbon monoxide and carbon dioxide over nickel supported on rare earth oxides 255

Carbon tetrachloride

Role of carbon tetrachloride in the conversion of methane on silica-supported alkali metal added alkaline earth oxide catalysts 83

Catalyst characterization (XPS)

Relationship between the catalytic properties and surface composition of a polycrystalline Fe-Ni ribbon 219

Catalyst characterization (TPD)

Lithium chemistry of lithium doped magnesium oxide catalysts used in the oxidative coupling of methane 131

Catalyst characterization (XPS, AES, TPD)

Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. I. Adsorption of the reduction modifiers, water and ϵ -caprolactam on ruthenium 281

Catalyst characterization (thermoreistance)

Activity and thermoresistance of fused iron catalysts for ammonia synthesis 29

Catalyst characterization (IR, XRD, phenol hydroxylation)

Titanium silicalite-2: Synthesis, characterization and catalytic properties L1

Catalyst characterization (TPD, nitric oxide adsorption)

Studies of molybdena-alumina catalysts. XVII sulfided catalysts exposed to air 199

Catalyst characterization (hydrogen-oxygen titrations)

Study of supported iridium catalysts by hydrogen-oxygen titrations. Influence of the support 175

Catalyst characterization (HETP, SEM, TPD, XRD)

Preparation of silico-alumino-phosphates by the rapid crystallization method and their catalytic performance in the conversion of methanol to light olefins 155

Catalyst characterization (micro-reactor studies)

Methanol synthesis catalysts derived from ternary rare earth, copper, zirconium and rare earth, copper, titanium intermetallic alloys 69

Catalyst preparation (impregnation)

Lithium chemistry of lithium doped magnesium oxide catalysts used in the oxidative coupling of methane 131

Catalyst preparation (crystallization)

Titanium silicalite-2: Synthesis, characterization and catalytic properties L1

Catalyst preparation (ion exchange)

Hydrogenation of ethyne over an ion-exchanged copper on silica catalyst 209

Catalyst preparation (in-situ oxidation)

Methanol synthesis catalysts derived from ternary rare earth, copper, zirconium and rare earth, copper, titanium intermetallic alloys 69

Catalyst preparation (crystallization)

Preparation of silico-alumino-phosphates by the rapid crystallization method and their catalytic performance in the conversion of methanol to light olefins 155

Ceria

Study of supported iridium catalysts by hydrogen-oxygen titrations. Influence of the support 175

Coke formation

Influence of the support towards platinum catalysed 1,3-butadiene hydrogenation 241

Coke formation

Coking and regeneration of zeolite catalysts in fixed beds during cumene cracking 53

Coke formation

Kinetic study of hydrogen transfer of olefins under catalytic cracking conditions 35

Coke formation

Coking, ageing and regeneration of zeolites. XI. Coke formation and deactivation of Pt-ultrastable zeolite HY and PtH-mordenite catalysts during hydrogenation of benzene 189

Copper

Methanol synthesis catalysts derived from ternary rare earth, copper, zirconium and rare earth, copper, titanium intermetallic alloys 69

Copper oxide

- Use of catalytic detector in temperature-programmed reduction 147

Copper/silica

- Hydrogenation of ethyne over an ion-exchanged copper on silica catalyst 209

Cracking

- Shape selectivity in Y-zeolites. Catalytic cracking of decalin-isomers in fixed bed micro reactors 105

Cracking

- Kinetic study of hydrogen transfer of olefins under catalytic cracking conditions 35

Cumene cracking

- Coking and regeneration of zeolite catalysts in fixed beds during cumene cracking 53

Cyclohexene

- Coking, ageing and regeneration of zeolites. XI. Coke formation and deactivation of Pt-ultrastable zeolite HY and PtH-mordenite catalysts during hydrogenation of benzene 189

Cyclohexene

- Kinetic study of hydrogen transfer of olefins under catalytic cracking conditions 35

Cyclopentene

- Kinetic study of hydrogen transfer of olefins under catalytic cracking conditions 35

Detector

- Use of catalytic detector in temperature-programmed reduction 147

Deuterium

- Relationship between the catalytic properties and surface composition of a polycrystalline Fe-Ni ribbon 219

Ethanol conversion

- Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Study of the reaction network 119

Ethene

- Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Study of the reaction network 119

Ethyne hydrogenation

- Hydrogenation of ethyne over an ion-exchanged copper on silica catalyst 209

Ethyne hydrogenation

- Activity and selectivity of Pd/ α -Al₂O₃ for ethyne hydrogenation in a large excess of ethene and hydrogen 227

Fluid catalytic cracking

- Octane enhancement in fluid catalytic cracking. I. Role of ZSM-5 addition and reactor temperature 1

Fluid catalytic cracking

- Octane enhancement in fluid catalytic cracking. II. Operation in the overcracking regime 19

Fused iron

- Activity and thermoresistance of fused iron catalysts for ammonia synthesis 29

Hydride-forming alloys

- Efficient dehydrogenation of methanol using hydride-forming alloys (Zr₂Ni, R₂Co₇ and RFe₂) as hydrogen acceptors 165

Hydrocarbon partial oxidation

- Transient response studies of C₄ hydrocarbon oxidation over MnMoO₄/MoO₃ catalysts 305

Hydrogen acceptors

- Efficient dehydrogenation of methanol using hydride-forming alloys (Zr₂Ni, R₂Co₇ and RFe₂) as hydrogen acceptors 165

Hydrogen transfer

- Kinetic study of hydrogen transfer of olefins under catalytic cracking conditions 35

Hydrogen-oxygen titrations

- Study of supported iridium catalysts by hydrogen-oxygen titrations. Influence of the support 175

Iridium

- Study of supported iridium catalysts by hydrogen-oxygen titrations. Influence of the support 175

Iron-nickel

- Relationship between the catalytic properties and surface composition of a polycrystalline Fe-Ni ribbon 219

Isomerization

- Kinetic study of hydrogen transfer of olefins under catalytic cracking conditions 35

Isotopic exchange

- Isotopic exchange measurements of the rate of interconversion of carbon monoxide and carb-

- on dioxide over nickel supported on rare earth oxides 255
- Isotopic exchange**
Relationship between the catalytic properties and surface composition of a polycrystalline Fe-Ni ribbon 219
- Kinetics**
Hydrogenation of ethyne over an ion-exchanged copper on silica catalyst 209
- Kinetics**
Kinetic study of hydrogen transfer of olefins under catalytic cracking conditions 35

Activity and selectivity of Pd/ α -Al₂O₃ for ethyne hydrogenation in a large excess of ethene and hydrogen 227
- Lanthanum oxide**
Oxypropylolysis of natural gas 269
- Lithium**
Lithium chemistry of lithium doped magnesium oxide catalysts used in the oxidative coupling of methane 131
- Lithium/magnesium oxide**
Lithium chemistry of lithium doped magnesium oxide catalysts used in the oxidative coupling of methane 131
- Lithium-barium/silica**
Role of carbon tetrachloride in the conversion of methane on silica-supported alkali metal added alkaline earth oxide catalysts 83
- Magnesia**
Study of supported iridium catalysts by hydrogen-oxygen titrations. Influence of the support 175
- Maleic anhydride production**
Transient response studies of C₄ hydrocarbon oxidation over MnMoO₄/MoO₃ catalysts 305
- Manganese**
Transient response studies of C₄ hydrocarbon oxidation over MnMoO₄/MoO₃ catalysts 305
- Membrane reactor**
Efficient dehydrogenation of methanol using hydride-forming alloys (Zr₂Ni, R₂Co₇ and RFe₂) as hydrogen acceptors 165
- Methane conversion**
Role of carbon tetrachloride in the conversion of methane on silica-supported alkali metal added alkaline earth oxide catalysts 83
- Methane oxidative coupling**
Oxypropylolysis of natural gas 269
- Methane oxidative coupling**
Lithium chemistry of lithium doped magnesium oxide catalysts used in the oxidative coupling of methane 131
- Methanol conversion**
Preparation of silico-alumino-phosphates by the rapid crystallization method and their catalytic performance in the conversion of methanol to light olefins 155
- Methanol dehydrogenation**
Efficient dehydrogenation of methanol using hydride-forming alloys (Zr₂Ni, R₂Co₇ and RFe₂) as hydrogen acceptors 165
- Methanol synthesis**
Methanol synthesis catalysts derived from ternary rare earth, copper, zirconium and rare earth, copper, titanium intermetallic alloys 69
- Molybdena-alumina**
Studies of molybdena-alumina catalysts. XVII sulfided catalysts exposed to air 199

Molybdenum

- Transient response studies of C₄ hydrocarbon oxidation over MnMoO₄/MoO₃ catalysts 305

Natural gas

- Oxypropylolysis of natural gas 269

Nickel oxide

- Use of catalytic detector in temperature-programmed reduction 147

Nickel/rare earth oxides

- Isotopic exchange measurements of the rate of interconversion of carbon monoxide and carbon dioxide over nickel supported on rare earth oxides 255

Niobia

- Study of supported iridium catalysts by hydrogen-oxygen titrations. Influence of the support 175

Octane enhancement

- Octane enhancement in fluid catalytic cracking. II. Operation in the overcracking regime 19

Octane enhancement

- Octane enhancement in fluid catalytic cracking. I. Role of ZSM-5 addition and reactor temperature 1

Overcracking regime

- Octane enhancement in fluid catalytic cracking. II. Operation in the overcracking regime 19

Oxygen spillover

- Transient response studies of C₄ hydrocarbon oxidation over MnMoO₄/MoO₃ catalysts 305

Oxypropylolysis

- Oxypropylolysis of natural gas 269

Palladium/alumina

- Activity and selectivity of Pd/ α -Al₂O₃ for ethyne hydrogenation in a large excess of ethene and hydrogen 227

Platinum/alumina

- Influence of the support towards platinum catalysed 1,3-butadiene hydrogenation 241

Platinum/magnesia

- Influence of the support towards platinum catalysed 1,3-butadiene hydrogenation 241

Platinum/silica

- Influence of the support towards platinum catalysed 1,3-butadiene hydrogenation 241

Propene

- Coking and regeneration of zeolite catalysts in fixed beds during cumene cracking 53

Propene oxidation

- Relationship between the catalytic properties and surface composition of a polycrystalline Fe-Ni ribbon 219

Rare earth

- Methanol synthesis catalysts derived from ternary rare earth, copper, zirconium and rare earth, copper, titanium intermetallic alloys 69

Rare earth oxides

- Isotopic exchange measurements of the rate of interconversion of carbon monoxide and carbon dioxide over nickel supported on rare earth oxides 255

Reaction network

- Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Study of the reaction network 119

Reactor temperature

- Octane enhancement in fluid catalytic cracking. I. Role of ZSM-5 addition and reactor temperature 1

Regeneration

- Coking and regeneration of zeolite catalysts in fixed beds during cumene cracking 53

Regeneration

- Coking, ageing and regeneration of zeolites. XI. Coke formation and deactivation of Pt-ultrastable zeolite HY and PtH-mordenite catalysts during hydrogenation of benzene 189

Regeneration

- Lithium chemistry of lithium doped magnesium oxide catalysts used in the oxidative coupling of methane 131

Regeneration

- Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. II. Catalytic hydrogenation of benzene to cyclohexene and cyclohexane 291

Ruthenium

Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. I. Adsorption of the reduction modifiers, water and ϵ -caprolactam on ruthenium 281

Ruthenium/alumina

Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. II. Catalytic hydrogenation of benzene to cyclohexene and cyclohexane 291

Selectivity (acrolein)

Relationship between the catalytic properties and surface composition of a polycrystalline Fe-Ni ribbon 219

Selectivity (butene)

Influence of the support towards platinum catalysed 1,3-butadiene hydrogenation 241

Selectivity (cis-decalin)

Shape selectivity in Y-zeolites. Catalytic cracking of decalin-isomers in fixed bed micro reactors 105

Selectivity (cyclohexene)

Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. I. Adsorption of the reduction modifiers, water and ϵ -caprolactam on ruthenium 281

Selectivity (cyclohexene)

Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. II. Catalytic hydrogenation of benzene to cyclohexene and cyclohexane 291

Selectivity (ethane, ethene)

Lithium chemistry of lithium doped magnesium oxide catalysts used in the oxidative coupling of methane 131

Selectivity (ethene, alkenes)

Oxypropylsis of natural gas 269

Selectivity (ethene)

Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Study of the reaction network 119

Selectivity (ethene)

Activity and selectivity of Pd/ α -Al₂O₃ for ethyne hydrogenation in a large excess of ethene and hydrogen 227

Selectivity (gasoline octane)

Octane enhancement in fluid catalytic cracking. II. Operation in the overcracking regime 19

Selectivity (gasoline octane)

Octane enhancement in fluid catalytic cracking. I. Role of ZSM-5 addition and reactor temperature 1

Selectivity (hydrocarbons)

Relationship between the catalytic properties and surface composition of a polycrystalline Fe-Ni ribbon 219

Selectivity (light alkenes)

Isotopic exchange measurements of the rate of interconversion of carbon monoxide and carbon dioxide over nickel supported on rare earth oxides 255

Selectivity (light alkenes)

Preparation of silico-alumino-phosphates by the rapid crystallization method and their catalytic performance in the conversion of methanol to light olefins 155

Selectivity (shape-)

Shape selectivity in Y-zeolites. Catalytic cracking of decalin-isomers in fixed bed micro reactors 105

Semiconductor

Oxypropylsis of natural gas 269

Silica-alumina

Study of supported iridium catalysts by hydrogen-oxygen titrations. Influence of the support 175

Silico-alumino-phosphates

Preparation of silico-alumino-phosphates by the rapid crystallization method and their catalytic performance in the conversion of methanol to light olefins 155

Solid acid

Preparation of silico-alumino-phosphates by the rapid crystallization method and their catalytic performance in the conversion of methanol to light olefins 155

Strontium

Oxypropylsis of natural gas 269

Syngas conversion

Methanol synthesis catalysts derived from ternary rare earth, copper, zirconium and rare earth, copper, titanium intermetallic alloys 69

Temperature-programmed reduction

- Use of catalytic detector in temperature-programmed reduction 147

Thermoresistance

- Activity and thermoresistance of fused iron catalysts for ammonia synthesis 29

Thiophene hydrodesulphurization

- Studies of molybdena-alumina catalysts. XVII sulfided catalysts exposed to air 199

Titanium

- Methanol synthesis catalysts derived from ternary rare earth, copper, zirconium and rare earth, copper, titanium intermetallic alloys 69

Titanium silicalite

- Titanium silicalite-2: Synthesis, characterization and catalytic properties L1

Water

- Selectivity to cyclohexene in the gas phase hydrogenation of benzene over ruthenium, as influenced by reaction modifiers. I. Adsorption of the reduction modifiers, water and ϵ -caprolactam on ruthenium 281

Zeolites

- Conversion of ethanol in aqueous solution over ZSM-5 zeolites. Study of the reaction network 119

Zeolites

- Coking, ageing and regeneration of zeolites. XI. Coke formation and deactivation of Pt-ultrastable zeolite HY and PtH-mordenite catalysts during hydrogenation of benzene 189

Zeolites

- Coking and regeneration of zeolite catalysts in fixed beds during cumene cracking 53

Zeolites

- Shape selectivity in Y-zeolites. Catalytic cracking of decalin-isomers in fixed bed micro reactors 105

Zeolites

- Octane enhancement in fluid catalytic cracking. II. Operation in the overcracking regime 19

Zeolites

- Octane enhancement in fluid catalytic cracking. I. Role of ZSM-5 addition and reactor temperature 1

Zirconium

- Methanol synthesis catalysts derived from ternary rare earth, copper, zirconium and rare earth, copper, titanium intermetallic alloys 69
